

Incident Report :

Ticket ID: CS-0252

Category: Proxy – Access to Dark Web Sites Detected

Date & Time of Detection: 2025-03-13 21:04 UTC

Reported By: Security Operations Centre (SOC)

Severity Level: Medium

Status: Closed

Incident Summary:

On March 13, 2025, user (System Admin L2) attempted to access a Tor gateway site (tor2web.io) from internal source IP . The proxy categorized the URL under Proxy Avoidance and recorded a GET request to <http://tor2web.io>. Although the request was allowed, the server responded with 403 Forbidden, and no content was successfully accessed.

Detailed Log Information:

Timestamp	User name	Source IP	Destination IP	URL	Web Category	Action	HTTP Method	Response Code
2025-03-13 21:04	James			http://tor2web.io	Proxy Avoidance	Allowed	GET	403

Destination IP Reputation:

- IP:
- Abuse Reports: 3 (Confidence of Abuse: 9%)
- ISP: Massachusetts Institute of Technology
- Usage Type: University/College/School
- ASN: AS38726
- Hostname: belegost.csail.mit.edu
- Domain: mit.edu

- Location: Tyngsboro, Massachusetts, USA

Domain Reputation Analysis:

- Domain: tor2web.io
- Registered On: 2017-02-14
- Expires On: 2026-02-14
- Status: clientTransferProhibited
- Name Servers:
 - dns1.registrar-servers.com
 - dns2.registrar-servers.com

User Analysis:

- User:
- Role: System Admin L2
- Reported Activity: Attempted access to tor2web.io, a known dark web gateway.
- User Statement: Claimed it was unintentional, occurred during research on proxy services.

Proxy Log Analysis:

- Method: HTTP GET
- Response Code: 403 (Forbidden – access blocked by remote server)
- Action: Allowed by proxy, but access attempt was unsuccessful.
- Category Triggered: Proxy Avoidance
- Referrer: Google Search (<https://www.google.com/search?q=http://tor2web.io>)

Actions Taken:

User Contacted: Discussion held with _____ for intent clarification.

User Clarification: Claimed visit was accidental during research.

Web Category Escalation: “Proxy Avoidance” flagged for block by Security Engineering Team

Security Awareness: Reiterated policy on responsible internet usage with the user.

Conclusion:

- True Positive – Attempted access to a dark web proxy gateway.

- No impact – Request was blocked by remote server (403 error).
