

Incident Report

Incident Details

- **Incident Title:** VPN Login from Unregistered / Non-Compliant Device
- **Ticket ID:** CS-0274
- **Status:** Closed
- **Priority:** Normal
- **Department:** Support
- **Source:** VPN Logs (Monitoring Alert)
- **User Involved:** (CEO Assistance)
- **Date/Time of Event:** 25 March 2025, 09:34 AM

Incident Summary

A VPN login was detected from an **unregistered iOS device (iPhone14Pro)** associated with user . The device was not part of the company's compliant/registered inventory. Although the authentication and MFA challenge were successful, this activity was flagged as a **policy violation**.

Source IP Analysis

- **Source IP:**
- **ISP:** T-Mobile USA, Inc.
- **Usage Type:** Mobile ISP
- **ASN:** Unknown
- **Domain:** t-mobile.com
- **Country:** United States
- **City:** Los Angeles, California

Assessment: The login originated from a U.S.-based T-Mobile mobile network, consistent with mobile device activity.

VPN Log Analysis

Timestamp	Source IP	Host name	Device Type	Message	MFA Status	Session Status
25 Mar 2025 10:05	30	iPhone14Pro	iOS	Session timed out due to inactivity (30 minutes)	Success	Idle Timeout
25 Mar 2025 09:34	30	iPhone14Pro	iOS	Session started (Corporate_VPN, FullAccess role)	Success	Active
25 Mar 2025 09:34	30	iPhone14Pro	iOS	Authentication successful	Success	Authenticated
25 Mar 2025 09:34	30	iPhone14Pro	iOS	MFA Challenge initiated (OTP sent to registered mobile)	OTP Sent	Pending Auth
25 Mar 2025 09:34	30	iPhone14Pro	iOS	Authentication initiated	Prompted	Authentication
24 Mar 2025 12:45	.22.2 12	ENDP-002	ows 11	Previous corporate device session timed out due to inactivity	Success	Idle Timeout

Key Findings:

- Successful login occurred from a personal iPhone14Pro.
- Prior logins were from a registered corporate (, 11).
- Authentication and MFA were valid → no brute force or compromise indicators.

User Details

- **User:** (CEO Assistance)
- **Manager:** (Management)
- **Registered Corporate Endpoint:** (11-64)
- **Primary Email:**
- **Phone:** +91 8670987836

IOC Scoping

- **IOC Check for Source IP (172.58.20.30):** No additional suspicious logs found.
- **IOC Check for User ():** No phishing emails, suspicious downloads, or anomalous activity observed within 10 days prior to login.
- **Conclusion:** No signs of account compromise or malware activity.

Actions Taken

User Verification:

- a. Interviewed to confirm login activity.
- b. User admitted using a **personal iPhone with a free VPN service** to access Corporate VPN.

Security Enforcement:

- a. Warned user against using **unregistered/personal devices** for corporate VPN access.
- b. Reminded of corporate **device compliance policies**.
- c. Awareness session scheduled to reinforce policy adherence.

Conclusion

- **Classification:** True Positive (Policy Violation – Non-Compliant Device Access)
- **Root Cause:** User accessed VPN using a personal iOS device with a free VPN service.
- **Impact:**
 - No compromise or malicious activity detected.
 - Security policy violation identified.
- **Resolution:**
 - Login confirmed as legitimate.
 - User advised and warned.
 - No further action required.
- **Ticket Status:** Closed (Resolved with User Awareness).
