

Ticket #CS-0268

VPN:- Login from IP with bad reputation

Severity: Normal

Date & Time: 23-February-2025, 08:29 AM

User:

Source IP:

Destination IP:

Hostname: Dstldfnd

Device Type:

Disconnect Reason: MFA Challenge Failed

Incident Summary:

On 23-February-2025 at 08:29 AM, multiple failed VPN login attempts were observed for the user [REDACTED] from a suspicious IP address [REDACTED] located in Argentina. The device used was an [REDACTED] running VPN. Authentication methods included both MFA and password-based login, with multiple MFA challenges sent but ultimately failed due to incorrect OTPs. The login attempts failed consistently, and no VPN session was established. The source IP has a bad reputation, reported over 5736 times. This suggests a possible brute-force attack or credential stuffing attempt using the user's credentials.

Source IP Analysis:

ISP	Telecentro S.A.
Usage Type	Fixed ISP
ASN	AS27747
Hostname(s)	cpe-186-23-212-74.telecentro-reversos.com.ar
