

Incident Report

Ticket ID: CS-0264

Incident Type: VPN – Password Brute Force Attack

Severity: Normal

Status: Closed

1) Incident Details

- **Date & Time:** 16-March-2025, 17:11
- **User Impacted:**
- **Source IP:** (India, reported 43,893 times, confidence of abuse 100%)
- **Destination IP:** (, Marketing Department)
- **Hostname:**
- **Device Type:** 11
- **Session Status:** Authentication Initiated
- **Message:** User Realm Corporate_VPN – Authentication initiated

2) Incident Summary

On 16-March-2025, multiple VPN login attempts were detected for from IP

- Password authentication **succeeded**, but **MFA challenges consistently failed** due to incorrect OTPs.
- No VPN session was successfully established.
- This is indicative of a **credential stuffing or brute-force attack**.

3) Source IP Analysis

- **ISP:** Trinn Technologies Pvt. Ltd.

- **Usage Type:** Fixed ISP
- **ASN:** Unknown
- **Domain:** trinn.in
- **Country / City:** India / Khekra, Uttar Pradesh
- **Reputation:** 43,893 abuse reports; confidence of abuse 100%

Observation: Attacker is using a high-risk IP attempting unauthorized access.

4) VPN Log Analysis

Splunk Query:

```
index=main source="vpn_logs.csv" "  
| table timestamp Hostname authentication_method Message mfa_status  
session_status disconnect_reason
```

Findings:

- Multiple MFA challenges initiated; all failed due to incorrect OTPs.
- Password authentication succeeded, confirming credentials may have been compromised.
- No unauthorized access occurred because MFA blocked the attacker.

Sample Events:

Timestamp	Host name	Auth Method	Message	MFA Stat us	Session Status	Disconn ect Reason
3/16/2025 17:14	SH DM 543 3	MFA	MFA Challenge failed: Incorrect OTP	Fail ed	None	Failed Authenti cation
3/16/2025 17:14	SH DM 543 3	Pass word	Authentication initiated	Pro mpt ed	Authentic ation initiated	None

*(Similar repeated
attempts logged at
17:11–17:14)*

5) IOC Scoping

Splunk Query:

```
index=main source="vpn_logs.csv" "103.91.136.18"
```

Findings:

- Only [REDACTED] was targeted.
- 18 login attempts from this IP, **100% events** related to this user.
- No other users affected.

6) Actions Taken

- **Firewall:** Blocked source IP [REDACTED] (inbound & outbound).
- **User Account:** Credentials reset for [REDACTED] (via IT Helpdesk).
- **Monitoring:** No further attempts detected post-blocking.

7) Conclusion

- **Attack Type:** Brute Force / Credential Stuffing
- **Classification:** True Positive
- **Impact:** None (MFA prevented unauthorized access)
- **Status:** Closed
