

Incident Summary

1) Title Of the Incident

Firewall: Ping Of Death (Ticket No: -CS-0195)

2) Incident Details

- **Receive Time:** - 2/11/2025 13:49
- **Source IP:** -
- **Destination IP:** -
- **Destination Port:** - 1
- **Threat Name:** - Ping Of Death
- **Severity:** - High
- **Action Taken:** - Blocked
- **Protocol:** - ICMP
- **Direction:** - Inbound

3) Description Of Incident

On 18th February 2025 at 13:49, the firewall detected a Ping of Death attack targeting internal IP [REDACTED]. The attack was classified as high severity. The firewall automatically blocked the malicious source IP [REDACTED]. The protocol involved was ICMP.

4) Investigation Summary

Suspicious IP:

During the investigation, the source IP [REDACTED] was identified as the origin of the Ping of Death attack.

This IP has been reported a total of **318,735 times** by **1,032 distinct sources**, indicating a high reputation for malicious behavior.

Geolocation Information:

- **Country:** Russian Federation
- **City:** Saint Petersburg, St.-Petersburg

Historical Malicious Activity:

According to threat intelligence sources, this IP has previously been involved in:

- **Brute-force attacks**

- **Web application attacks**

Based on this data, the IP was confirmed as **malicious** and was blocked at the firewall level to prevent further impact.

Splunk Findings: -

The screenshot shows the Splunk Enterprise interface. The search bar contains the query: `index=main source="Firewall_logs.csv" "92.255.85.253" | stats count by srcIP dstIP dstPort Protocol Action | where count > 100 | table srcIP dstIP dstPort Protocol Action count`. The search results show 571 events. The table below displays the search results.

srcIP	dstIP	dstPort	Protocol	Action	count
92.255.85.253	10.0.2.20	1	icmp	blocked	571

5)Action Taken

- Source 92.255.85.253 was permanently blocked at the perimeter firewall.
- ICMP traffic patterns were analyzed for further anomalies.
