

Incident Summary

1) Title Of the Incident

Firewall: Port Scanning Detected (Ticket No: -CS-0193)

2) Incident Details

- **Receive Time:** - 2/16/2025 8:55 IST
- **Source IP:** -
- **Destination IP:** -
- **Destination Port:** - 20
- **Threat Name:** - Port Scanning detected
- **Severity:** - Medium
- **Action Taken:** - Blocked
- **Protocol:** - TCP
- **Direction:** - Inbound

3) Description Of Incident

On 16th February 2025 at 08:55 IST, the firewall detected a port scanning attempt targeting the internal IP address on **TCP port**. The scan originated from the external source IP address.

Given the nature of the activity, the severity was classified as **Medium**, and the firewall automatically **blocked the inbound traffic** to prevent further reconnaissance or potential exploitation.

4) Investigation Summary

Suspicious IP:

The suspicious IP address was found to be external and not associated with our internal network. Upon checking its reputation on **AbuseIPDB**, it has been reported **38 times** by **21 distinct sources**. The IP has a known history of engaging in **brute-force attacks** and **port scanning activities** targeting various organizations.

Geolocation Information:

- **Country:** Kyrgyzstan
- **City:** Bishkek, Bishkek

Historical Malicious Activity:

According to threat intelligence sources, this IP has previously been involved in:

- **Brute-force attacks**
- **Port Scanning**

Based on this data, the IP was confirmed as **malicious** and was blocked at the IPS level to prevent further impact.

```

```
| table srcIP dstIP dstPort
```

A total of 4,825 events were observed originating from source IP [redacted] all targeting destination IP [redacted] on port 3389 (RDP). This pattern is indicative of a targeted brute-force or reconnaissance attempt focused on Remote Desktop Protocol (RDP) services

5)Action Taken

The network team was contacted immediately and instructed to **block the source IP address** [redacted] as it was identified to be performing **port scanning** activities targeting internal host [redacted]
